

# Ehap Fathy

## Full Stack Developer

*ehapfathy206@gmail.com | https://www.linkedin.com/in/ehap-fathy-066227338/  
Ainshams,Cairo | +201500442416*

Junior Full Stack Developer combining front-end development using React with back-end development using PHP and Laravel. Experienced in building and consuming RESTful APIs, handling authentication, and managing databases using MySQL. Strong understanding of modern UI development and component-based architecture. Seeking a junior role to grow technical skills and deliver scalable web applications.

## Work Experience

**Web Development** Sep 2023 - Present  
| WE School for Applied Technology

Gained hands-on experience in front-end and back-end development, learning HTML, CSS, JavaScript, PHP, MySQL, and Laravel. Built and managed databases, implemented CRUD operations, and practiced MVC architecture.

•

**Team Member / Front-End Developer**  
| Competition

Participated in the Digitopia 2025 National Technology Competition as a team member. Contributed to front-end development using React, implementing interactive UI components. Collaborated with the team to design and build the SAATEA web application for digital innovation. Gained experience in project planning, coding, debugging, and delivering a functional web application under competition requirements.

## Projects

**Sateaa** Aug 2025 - Dec 2025

Developed a responsive web application using React.js, collaborated within a team environment, implemented reusable components, and applied modern UI/UX and responsive design principles.

**Ecommerce-Project** Nov 2025 - Dec 2025

Built a responsive e-commerce site with dynamic product listings, category filtering, and shopping cart. Integrated API for real-time product data and used SweetAlert for notifications. Developed reusable components for scalable and maintainable code.

**Discover Egypt** Oct 2025 - Nov 2025

Built a PHP-based web application to explore Egypt's tourist destinations. Simple user interface with HTML and PHP. Navigation between pages and dynamic content generation. File-based content management, no database required.
